1. Mooring

1.1. Mooring lines

We provide straight different factories a wide array of mooring lines. Our ropes construction include all know types, laid ropes as 3 to 6 strand, plaited ropes as 8 strand (square), 12 strand braided ropes, double braided ropes, solid braided rope, parallel strand rope and kern mantel rope type.

We are using a wide variety of fiber from Dymoema SK75, SK78, SK90, SK99, Technora, vectran, Kevlar, High Tenacity Polyester, Polyamide.

Based on the vessel's needs, we can mix different type of fibers to get the required expected final result, from core to cover.

All our mooring lines are spliced at the needed loop diameter with different required finished as leather /polyester covers, specific whipping colors.

1.2. Rock Tie Lines - Soft Shackles – Slings

These floating lines are either made out of Dyneema SK75,78 core carrying also a Dyneema cover to ensure buoyancy. The second option is replacing Dyneema by UHMWPE for core and cover. Different colors are available.

To attach these rock tie lines, we advise using slings around the rocks linked together with a Dyneema soft shackle (buoyant as well). We provide all existing slings sizes as well as dyneema soft shackles.

1.3. Anchor Chain

Up to 120 grade.

1.4. Hydraulic/Rope Mooring Dampers (Rope Stretcher)

Rope stretchers (up to 30-35% elongation) of different length based on the required damping effect. We also have hydraulic and mechanical options.

1.5. Fenders and covers

We distribute Fendress fenders from 23 by 56 cm all the way to 125 by 600 cm. These inflatable fenders are considered the best on the market.

These are light and ultra-resistant, easy to handle, carry strengthened strips for optimal resistance, stainless steel D-rings, tensile strength up to 3.5t, have waterproof valve and are easy to inflate and deflate. They are available in 5 colors and more than 20 dimensions are available.

We manufacture fender lines at required length and diameter and provide covers if needed.

As for fenders, we provide Fendress covers either 100 % Acrylic or Neoprene from 23 by 56 cm all the way to 125 by 600 cm.

All covers are adaptable on all Inflatables Fenders dimensions, available in 16 different colors, are customizable with embroidery (yacht name..), the fabric thickness is doubled on the acrylic

covers, no seam running along the entire cover length and the locking system is made by a solid string.

1.6. Transom Fenders/ aft protection (inflatable)

1.7. Aft steps for boarding

Made of wooden, fiber glass, or carbon. 2 to 6 steps based on requirement. Aluminum foldable options available.

1.8. Inflatable platforms

240x50x21cm or 300x200x21cm, anti-slip, inflatable. Other non-standard size available on upon request.

1.9. Fender Hooks

Our fender hook offer includes stainless steel and carbon fiber structure. The inner part is made of French sheepskin, covered with 3mm marine leather.

We uses Stainless Steel Harken cleats (up to 16mm fender line diameter), open or closed fairleads.

We also offer a **refurbishing service** of your hooks, from the sheepskin, marine leather cover replacement as well as fittings if required.

1.10. Main de fer, snubber line

Many hook options from galvanized, painted or SST. Different link finish between the hook and line, from splicing, splicing plus soft shackle, other connectors.

1.11. Fender Lines

Hight tenacity polyester lines of any diameter. Different colors available plus finishes.

1.12. Chafe guards/Chafe Pro

Distributing Chafe Pro for mooring line and fender lines. We also have other options and more durable material as Technora fabric.

1.13. Monkey Fist/line thrower

Genuine marine leather - Lead shot processed inside - Stainless steel eyelet - Weight 400g

1.14. Vessel Towing lines

1.15. Accessories (anchor Balls/Toys floating line/ AirPump)

2. Dock/Shore

2.1. Water Hose & HT Polyester Covers

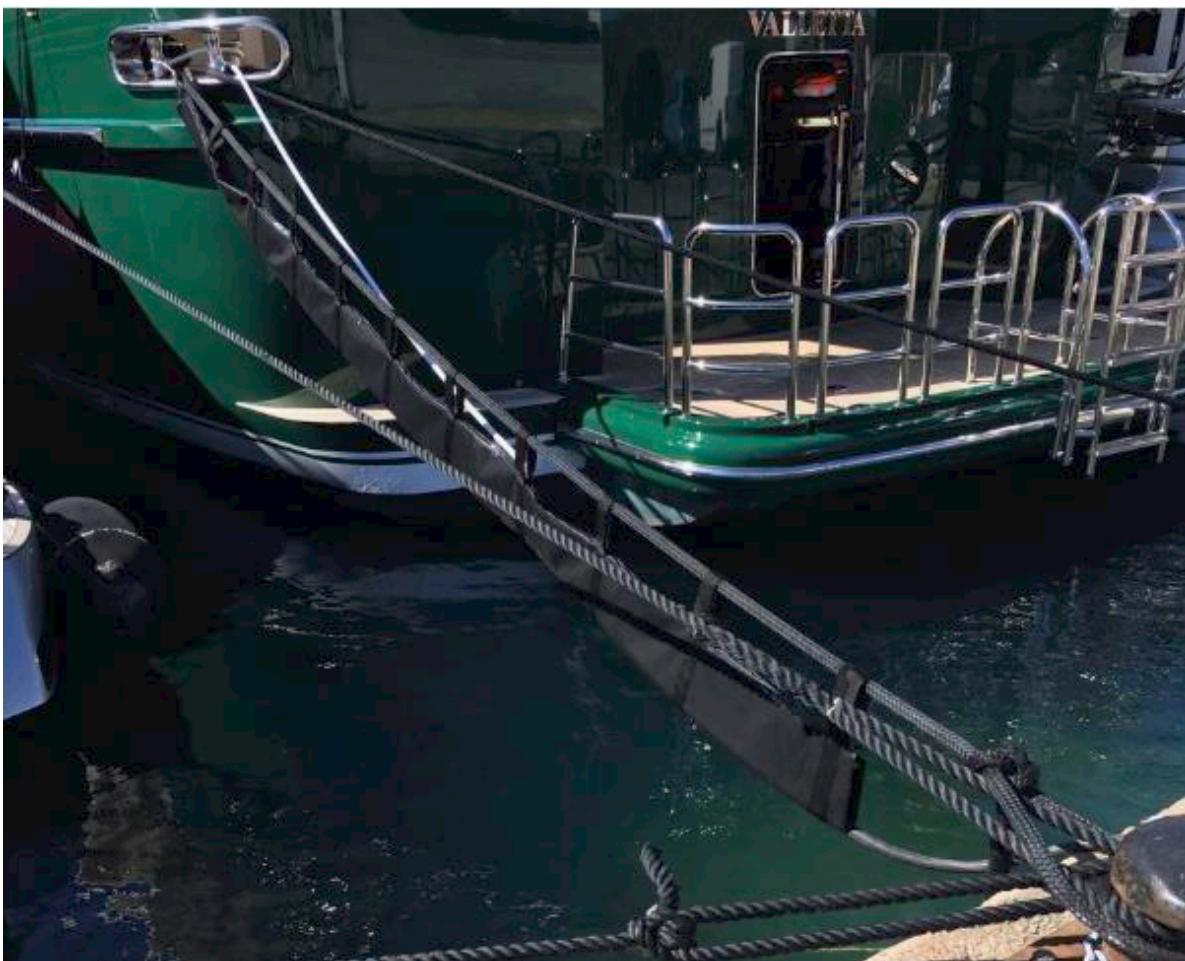

2.2. Water Filtration

2.3. Electrical Cable

2.4. Electrical adaptors

2.5. Shore Line Wrap - Cable management

Sunbrella marine+® fabric - YKK® zip closing - Velcro® fasteners – 3 Colors

2.6. Rat Guards

This Rat Guard takes up very little storage room, installs easily and can be used in port when docked or at anchor. The split-hub design allows the guards to be installed after the dock lines have been secured or the anchor has been set.

Installation: Open the grey split-hub and close it around the line or chain. The inside of the central section features dual rubber baffles that close tightly around the line or chain keeping the guard in place. Then just clip on the black disc and the Rat Guard is ready for use.

Operation mode: When a rat encounters the disc and attempts to climb over it, the disc begins to spin around and the animal drops into the water. Smaller vermin are not able to climb up the slippery disc or pass through the center because the tight-fitting rubber baffles are preventing small vermin from passing through the center of the hub.

Rotating disc – No more vermin on board – Easy to use Very effective – Compact – Available in 3 sizes – Also usable for the anchor chaine

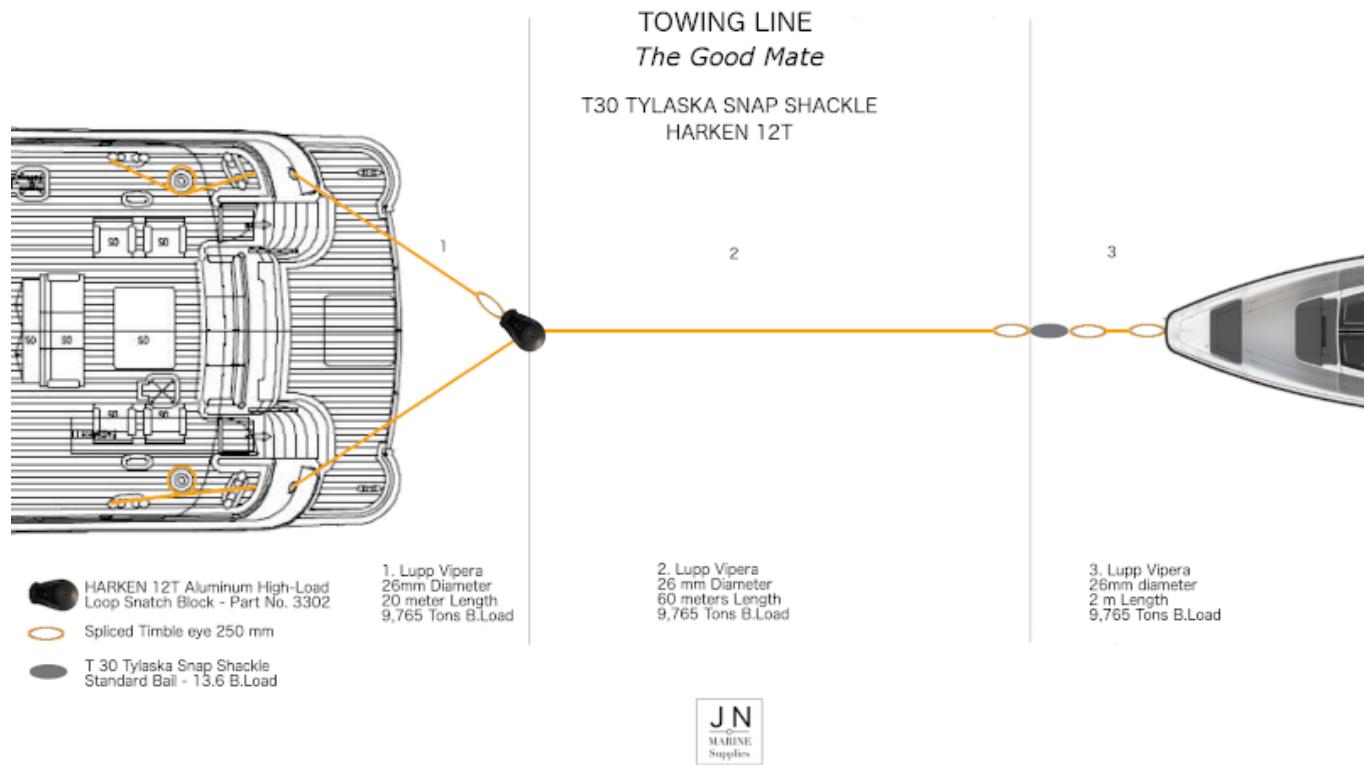

2.7. Rug Yacht Name

Personalized rugs with yacht name and logo.

3. Tender

3.1. Tender / Towing

3.1.1. Towing Kits

It all started with a question. How do you retrieve a fully-loaded six tonne, 11.5 metres (37ft) Axopar tender, when towed by a 55 meter Motor Yacht in less than four minutes, with only one deckhand?

Our new towing kit for large tender, “*The Good Mate*” is the handiest on the market due to its simple design, the Harken 12 Tons block and a Tylaska snap shackle.

We also provide standard towing lines and towing kits with bridles. As for mooring lines we provide required splicing and covers.

3.1.2. Towing Software – Tracking and Monitoring

Tow pro - tender towing system monitoring your tow 24/7

TowPro, the latest advance in tow protection, enables captains to prevent losses and reduce insurance claims.

TowPro puts Eyes in the Tender, providing an early warning of a potential problem by monitoring and displaying on the bridge real time status of the towed tender (bilge pump activity, battery voltage, pitch and yaw).

It then provides an Early Warning System on the bridge (alarm being audible, visual and descriptive)

Also elongation rate of the tow line is available, able to take action before the tow line reaches its limits.

3.1.3. Towing Dampers

Providing either either hydraulic or extra line acting as a damper.

3.2. Tender Mooring

3.2.1. Tender Whips

Fiberglass or Carbon fiber. Splitable pole for ease of storage, harken hardware.

3.2.2. Whip Hooks (leather-carbon fiber)

Whip hooks fitting your tender whips. We also refurbish them.

3.2.3. Tender Lines and Fenders, Fender Covers (plus embroidery if required)

3.2.4. Anchor Chain – Anchor

Galvanised or SST. We provide also anchors of any sizes and finishes.

3.3. Tender Onboard Equipment

3.3.1. Lifejackets

3.3.2. Portable VHF

3.3.3. Flags/Ensign/Yacht Club

3.3.4. EPIRB

3.3.5. First Aid Kit

Kit sealed in waterproof box.

4. Running Rigging

4.1. Sheets

We provide a wide array of sheets. Our ropes construction include 12 plaited core, 24 to 32 plaited covers for the more technical ones.

These technical sheets have different type of core, from SK 78/99 with many different covers based on the applications (vectran, twaron, Technora, HT polyester).

When breaking loads per diameter does not require high figures, we provide more standard sheets made of High Tenacity Polyester.

All our lines are have whipping finishes, we do not have any limits in regards of diameter. We can also tailored made sheets with your specific thread, diameters and B.Loads.

4.2. Halyards

In regards of halyards, same as for sheets we have a wide array of core and covers.

If you require pure Dyneema as SK78 or 99 with or without covers for your specific halyards please let us know.

Our halyards are spliced at the needed loop diameter with different finishes.

4.3. Control Lines

In regards of control lines, reefing lines, lazy jacks, same as for sheets and halyards, we have a wide array of core and covers.

If you require a blend of part HT Polyester, part Dyneema as SK78 or 99 with or without covers for your specific control lines please let us know.

Our lines are spliced at the needed loop diameter with different finishes.

4.4. Blocks and Shackles

Supplying Harken and Wichard blocks. We also can design one-offs.

5. Hardware

5.1. Lifting Dyneema Lines

5.2. Shackles SST

5.3. Shackles Galvanised

5.4. Tylaska

5.5. Wichard

5.6. Harken

5.7. Slings

5.8. Blocks

5.9. Sensors and load monitor - smartlink2

5.10. Harnesses + Helmets + Mousqueton

5.11. Soft Shackles Dyneema SK78

6. Flags and Ensigns

We supply Superyacht flags and ensigns which are fully sewn and not printed.

The fabric is made out of woven polyester, completed with rope and toggle ready to be hoisted.

Sizes goes all the way up to 548x274 cm.

We also provide code and alphabet flags as well as yacht clubs.

Please contact us directly by email with your requirements, measurements and we will get back to you with a quote. We ship worldwide.

7. Filtration and Separation

No matter your engine, generator, hydraulics, model, size, type we will have the right filter. Send us your references, quantities and we will do the rest. We deliver worldwide.
